SUPERVISORY PATENT EXAMINE

TECHNULUGY CENTER 3700

Continuation of 5. does NOT place the application in condition for allowance because: the specification and drawing still contain new matter. For example, the original disclosure discloses the skirt member is formed on a peripheral portion of the bottom face of the self-propelled member. The added new paragraph at page 19, discloses a skirt member is provided around a circumferential portion of the lower face of the self-propelled member, which is different from the original disclose of the skirt member formed on a peripheral portion of the bottom face of the self-propelled member. Also, the proposed new drawings of figure 12a does not have a compressor, which is considered new matter.
